Jarrett Lee

+65 9726 1311 | jarrettleehong@gmail.com | LinkedIn | Github | Singaporean

Business and Computer Engineering 3rd Year student with a strong interest and passion for learning new things. Experienced in software development, process optimization, and data automation through internships and national service leadership roles. Proven ability to manage logistics, coordinate large-scale events, and make strategic decisions under pressure.

Nanyang Technological University, Singapore **Aug 2024 - May 2028**

Double Degree
Bachelor of Business with Specialisation in Business Analytics
Bachelor of Engineering (Hons) in Computer Engineering

- Honours (Distinction) | Computer Engineering CGPA: 4.13/5.00, Business CGPA 4.26/5.00 (Current)
- NTU College Scholarship (Aug 2024 - May 2028)

SKILLS

- **Software:** Python, C, C++, R, Jupyter Notebook, Java, Microsoft Office, SQL, NoSQL, UiPath
- **Languages:** Native English, Full Professional Chinese, Limited Working Japanese (JLPT N3), Limited Working Indonesian (O level), Elementary German (Level 1)

HACKATHONS | CASE COMPETITIONS

MaritimeOne Case Summit 2025 **Oct 2025**

MaritimeOne ARROW Case Challenge: How can we use AI in Shipbroker Operations?

- Proposed and prototyped an AI-assisted dashboard for the shipbrokering company Arrow, targeting to improve their round-the-clock support.

Business Analytics Club Datathon 2025 **Oct 2025**

Consumer Behaviour in E-commerce

- Researched and developed actionable business plans from a dataset, processed in python using linear regression methods.

Future of Work: GenAI Augmentation Challenge 2025 **Jul 2025**

Making use of GenAI in the entertainment space

- Researched and developed actionable plans to make use of an AI assistant producer in a podcast, to filter through fan content ensuring that the content does not include any hate or any topics that the host should not be presenting on.

INTERNSHIP | WORK EXPERIENCE

Ministry of Home Affairs **May 2026 - Jul 2026**

Data Analyst / Process Automation (RPA) Developer Intern

- Created an automation in UiPath which transfers data between files in SharePoint, saving up to 16 man hours per week
- Delivered a division-wide sharing on communication strategies specifically relating towards

communication with tech staff to a non-technical audience of 150 people
- Evaluated Whole-of-Government tools such as FormSG and other government systems for data processing and collection in the Business Innovation context

Synapxe Pte Ltd **Apr 2024 - Jul 2024**

Innovation Capabilities Enablement Intern

- Created and maintained a database of ~250 client records in Microsoft Excel
- Used tools such as Excel VBA to automate record processing

Victoria School **Jan 2024 - Feb 2024**

Part Time relief teacher

- Imparted key learning objectives through physical and digital instructional means.
- Demonstrated patience, empathy, and problem-solving skills in managing challenging interactions.

Guards Formation, 7th Singapore Infantry Brigade **Oct 2022 - Nov 2023**

Platoon Sergeant, LightStrike Company

- Digitalised administrative processes to better identify trends and plan strategic welfare breaks and items.
- Overhauled processes relating to weaponry for the company resulting in a 15 minute reduction in average time for issuing weapons.
- Oversaw the daily activities of 30 other soldiers, focusing on regimentation and discipline

LEADERSHIP EXPERIENCE

24th Hall Council, NTU Hall of Residence 13 **Sep 2024 - May 2025**

Sports Secretary

- Coordinated with sports secretaries from 23 Halls to successfully deliver the NTU Inter-Hall Games, ensuring smooth inter-hall collaboration and event execution.
- Managed logistics and manpower allocation for 21 sports clubs within Hall 13, streamlining operations and supporting residents' participation.
- Supported the planning and execution of large-scale hall events, including Beach Day and Supper Night, enhancing student engagement and community spirit.

Victoria Junior College **Jun 2020 - Jun 2021**

Team Captain, Sailing

- Made strategic training decisions during the COVID period by incorporating conditioning programs that minimized performance losses.
- Evaluated team needs and initiated welfare activities during the COVID period to maintain the team's mental and physical health during disruptions.

AWARDS | ACHIEVEMENTS

- Edusave Award for Achievement, Good Leadership and Service (EAGLES) (2021)
- Regional Studies Program Scholarship (Jun 2016 - Dec 2019)
- Edusave Merit Bursary (2017)

CERTIFICATIONS

- JLPT N4, UiPath Developer (expiring 2028)

HOBBIES | INTERESTS

- Cheerleading, Sailing, Fishing, Language learning

PROJECTS

InstaScraper **Jun 2026**

How can we make use of Social Media to better plan our overseas trips?

- A process which scrapes instagram message data for shared instagram reels, extracting the reel captions and obtaining the respective locations from the captions using AI and plotting them onto a map which can be overlaid onto google maps. More features under development.
- Software used: Gemini, MongoDB, NoSQL

Dungeon Crawler Turn Based RPG **Apr 2026**

How can we better use Object Oriented Programming Principles?

- A project developed with 4 others, it explores how we apply object oriented programming principles in programming a single player turn-based role playing game. Players choose one of 2 characters and play through Easy, Medium and Hard levels to clear the game, with no graphics UI integrated. Collaboration was done through GitHub.
- Software used: Java, GitHub

BC2407 Analytics **Apr 2026**

Uncovering flight delay trends with R

- Analysed flight delays for flights arriving in and departing from JFK airport, and developed actionable insights and outcomes from the data on hand
- Performed data cleaning and noted trends relating to carriers, time of day, time of the month, season, and distance in their effects on delays
- Created a dashboard that assists in the prediction of flight delays, allowing JFK to restructure and respond accordingly
- Software used: R

Developing & Designing Databases **Sep 2025**

Uncovering national trends with SQL

- Analysed countries data focusing on nutrition, happiness rankings, life expectancy, and fast food chains per capita across different regions of the world
- Performed data cleaning and developed queries and dashboards to track the correlation between nutrition, fast food, life expectancy and happiness in various countries.
- Software used: SQL

BC2406 Analytics **Apr 2025**

Understanding gender trends in the field of Academia with R

- Analysed the claim that male doctors that graduated from an unnamed College of Medicine got paid

more and promoted preferentially based on their gender.
- Performed data cleaning and noted trends relating to gender, seniority, rank, productivity, and department
- Came up with rational conclusions and a data-backed defence to refute the claim of gender bias.
- Software used: R

Student Grouping & Sorting Algorithm **Nov 2024**

How do we develop computational thinking?

- A project developed with 4 others, it explores how we apply computational thinking principles in developing an algorithm which sorts students into groups based on gender, CGPA and school.
- Software used: Python, Jupyter Notebook
